

Technical Guide: Store & Supplier Onboarding

1. Retail Store Setup

Every store must provide legal and physical verification data to be activated for sales.

Column	Required	Description
name	Yes	Translatable String (EN/AR)
tax_number	Yes	Business Tax Identification
cr_number	Yes	Commercial Register Number
city_id	Yes	Foreign Key (Cities Table)
status	Yes	2 = ACTIVE

2. Product Catalog & Variance

Products require categorization and optional variant mapping for SKU-level tracking.

Column	Required	Purpose
price	Yes	Customer selling price
qty	Yes	Stock availability
is_variant	Yes	Multi-SKU logic
item_code	Yes	Variant SKU

3. Supplier Wholesale Module

Suppliers provide bulk inventory with a different pricing model.

- Price per Unit: Wholesale cost per SKU
- Unit Mapping: Box, Kg, Piece
- Supplier ID: Linked to supplier account

4. Order Fulfillment Flow

Status	Description
pending_approval	Waiting for review
accepted	Payment verified
shipped	In transit
delivered	Completed

CRITICAL FOR PURCHASE:

1. Product is_active = 1
2. Store status = Active
3. price > 0 and qty > 0
